## Pre-Care Instructions for ALL Microblading/PMU Procedures

### The Morning of Your Microblading/PMU Appointment:

- Do NOT drink coffee, energy drinks, or any other caffeinated beverages, as caffeine thins the blood.
- Do NOT take Niacin, Aspirin, Ibuprofen, or any other pain medication that thins the blood.
- Do NOT exercise.

### 24-48 Hours Prior To:

- Do NOT drink alcohol or be under the influence of drugs and/or alcohol.

### No Less Than **One (1)** Week Prior To:

- If so desired, wax or thread your brows. I will clean up the brow with a brow shaver if needed.
- Do NOT tweeze your eyebrows for at least one week.
- Tint your eyebrows. The pigment color I select is based on your brow color. If you normally have darker brows due to tinting and want this color for PMU Brows, please do this!
- Refrain from taking Vitamin E and/or Omega 3 (Fish Oil).

### No Less Than **Two (2)** Weeks Prior To:

- Refrain from Using Retinols and AHA Skincare Products.
- Receive Fillers, Collagen, or Fat Injections (Fat Injections are 4 weeks.)
- Refrain from tanning or intense sun exposure.

### No Less Than **Six (6)** Weeks Prior To:

- Refrain from using Retin-A. Depending on the length of use, the time frame may be longer. This needs to be discussed.
- Refrain from Laser and Chemical Peels. Depending on the strength and depth of the peel, the time frame may be longer. This needs to be discussed.
- Refrain from Microneedling, Vampire Facials, Photofacials, or any other intense skin rejuvenation treatments.

**Lip Procedures:** If you have ever had a cold sore/fever blister... even ONE time in your life, it is mandatory you get a prescription for Valtrex. Take 1 pill the day before the procedure, 1 pill the day of, and 1 pill a day for the next 4 days. Get 12 pills so you have enough for your perfecting session.

**Topical Anesthetic during ALL Permanent Makeup/Micropigmentation procedure(s):**

- **Procedure(s):** A topical anesthetic is used by LMB during all Microblading and other Micropigmentation procedures. The product is formulated to be perfectly safe and can be purchased over the counter from any pharmacy. It is placed over the treatment area 20-30 minutes prior to treatment. The use of the anesthetics combined with the procedure(s) you may experience some redness and swelling that can last 1-4 days.
- Follow all post-care procedure advice and instructions for best results.
- **Allergic reaction:** Can occur from any anesthetics used during the procedure(s). If you do suffer from an allergic reaction, you must contact your doctor immediately. Allergic reaction may show through redness, swelling, rash, blistering, dryness or any other symptoms associated with an allergic reaction.
- **Numbness:** LMB cannot accept responsibility if the area to be treated does not respond to the numbing cream. Each individual is different according to skin type.
